Re: JOB TITLE

Dear Hiring Manager,

I hope this message finds you well. I am writing to express my interest in the [POSITION NAME] position. As a fourth-year finance student at the UBC Sauder School of Business, I am eager to contribute my [2–3 QUALITIES FROM THE Job Description] to a program known for fostering [COMPANY VALUE / CULTURE TRAIT] within [COMPANY NAME].

At my current role as an FP&A Analyst at Seaspam, I run scenario and sensitivity analysis on a long-term forecast model, conducted budget-to-actual variance analysis across the consolidated income statement and balance sheet, and built rolling reforecasts that translated departments' cost estimates into projected budget, cost, and revenue. Given that Seaspam's FP&A function consolidates information from every finance team and operating department across the firm, my work fed directly into management and Board reporting. I also had the opportunity to attend the CFO Town Hall, where I observed the executive team discussing the firm's performance, opportunities, and risks, and contributed by preparing presentation slides and supporting a survey initiative. This experience has inspired me to make the most of every opportunity to grow within finance.

Previously, as a Business Analyst Intern at BC Hydro, I developed financial models, identified operational bottlenecks, and communicated data driven solutions through clear and structured storytelling, where my recommendations had direct, real world implications for many stakeholders. I also worked at Joshua Tree Health, a private equity firm specializing in healthcare startups with the potential to transform the mental health care industry, where I supported market research and due diligence by evaluating startups through revenue multiples, precedent transactions, and comparable company analysis.

As a personal project, I collaborated with a team of finance professionals to build a stock recommendation platform for beginner investors, using financial models to evaluate stock attractiveness, identify market trends, and estimate expected value ranges. I also create finance-related content covering market news, technical analysis, and beginner-friendly investing concepts, along with informational breakdowns. Outside of finance, one of my strongest passions is music production, along with exploring the boundaries of technology and AI, which reflects my values of creativity, discipline, and continuous learning.

What excites me most about this opportunity is to bring my unique blend of analytical, creative, and collaborative skills to the [COMPANY NAME AND PROGRAM/TEAM NAME]. Specifically, I noticed that [SPECIFIC FACT ABOUT THE JOB POSTING], and I am confident that [HOW I CAN MEET THAT CRITERIA WITH MY PERSONAL EXPERIENCES]. Overall, with my strong interest in [KEY LEARNING EXPERIENCE THEY'RE OFFERING], coupled with my proactive and eager approach, would make me a valuable addition to your team.

Thank you very much for considering my application. I look forward to the opportunity to discuss how my background and skills can contribute to [COMPANY NAME]'s mission of [COMPANY MISSION / WHAT THEY ACTUALLY DO].

Sincerely,
Kevin Liu

EDUCATION

The University of British Columbia, Sauder School of Business

Vancouver, Canada

Bachelor of Commerce, Major in Finance

Class of 2027

- **Key Courses:** Key Courses: Corporate Finance, Investment Theory, Investment Policy, Financial Institutions I, Managerial Economics & Accounting, Business Ethics & Communications, and Behavioural Finance.

EXPERIENCE

Seaspan ULC

Vancouver, Canada

FP&A Analyst

May 2026 – Present

- Ran scenario and sensitivity analysis on a 2027–2040 long-term forecast model (inflation, project-win, and best/worst-case scenario) to support financial reporting and value contract opportunities, while identifying errors and refining inputs.
- Translated departmental direct/indirect cost-split estimates into budgeted cost allocations, and validated results through monthly OH&GA variance analysis with driver-based commentary.
- Conducted month-end budget-to-actual variance analysis and validated financials across a consolidated income statement and balance sheet spanning 30+ departments for management and Board reporting.
- Developed 5 scenario-analysis slides for CFO Townhall, analyzing revenue, EBT, and labour drivers (production and salary hours) and translating long-term forecast output into executive-ready visuals for a 120+ person finance audience
- Executed rolling reforecasts by pulling, cleaning, and validating data (labor expense, headcount, hours) across multiple departments, comparing actuals against budget and collaborating with budget managers to produce updated forecast files.

BC Hydro

Vancouver, Canada

Business Analyst

May 2025 – Dec 2025

- Built financial forecasting models incorporating growth assumptions, cost drivers, and scenario analysis to project expenses exceeding \$10 million YTD, supporting planning, reporting, and assisting in high-level decision-making.
- Proposed a solution to recover and process 50% more lost data from the call center, improving data quality and reporting reliability, and enhancing agent efficiency by 3%, leading to annual savings of over \$50,000 by reducing handling time.
- Identified and fixed inefficiencies within the Interactive Voice Response (IVR) system, where 50% of callers were potentially misrouted to the general queue, adding an average of 5 minutes to each interaction's handle time.
- By improving utterance recognition, the IVR system increased placement accuracy from a 30% error rate to 25% across a sample of 4,000 calls, with the potential to save over 150,000 minutes annually when scaled.

Joshua Tree Health

Vancouver, Canada

Analyst, Private Equity

Oct 2024 – May 2025

- Conducted market research and screening on U.S. healthcare firms under \$1 million USD in EBITDA, assessing financial health and investment opportunities by evaluating earnings, working capital, and balance sheet risk.
- Conducted an in-depth market analysis of select niches within the mental health care industry by evaluating total market revenue, growth trends, and demographic factors to support strategic decision making.
- Evaluated 15+ seed stage companies with limited or early revenue (under \$500,000 ARR) using comparable company analysis, market benchmarks, and valuation metrics to assess growth drivers, scalability, and revenue sustainability.

EXTRACURRICULARS

UBC Open Robotics Club

Vancouver, Canada

Finance Executive

Mar 2024 – May 2025

- Created the 2024 Sponsorship Package outlining the values and objectives of the Open Robotics Club for outreach.
- Managed a \$10,000 per semester budget, tracking spendings, identifying variances, and coordinating with members, project leads, and administrators to align spending with strategic priorities and funding availability.

COMM 371 Investing Competition

Vancouver, Canada

2nd Place

Sep 2024 – Jan 2025

- Participated and competed in a Wall Street Survivor competition against all students taking Investment Theory (approximately 300 students in 50 groups), finishing in 2nd place with a 50% portfolio return.
- Operated under strict investment constraints, including mandatory portfolio allocations to fixed income securities, options trading, and derivatives, and restricted to predefined asset allocation ratios.
